Product Specifications

For current product specifications, please to go www.FattoadPro.com and type the model number into the search bar. Locate the product listing to view the current factory specifications.

Trouble Shooting

Performance Issue, Uneven or Unstable- Make sure all nuts and bolts are tight on the product. If they are, then loosen all nuts and bolts 1 full turn counter-clockwise, then go back and tighten each bolt only ½ turn tight. Then do a final tighten turn for another ½ turn tight. Next, Make sure there are not any missing nuts or bolts. Third, ensure all parts on the product are not broken or defective. Finally, Re-read the assembly instructions or watch the product demonstration video to ensure you have correctly assembled or are using the product properly with factory specifications.

Missing Parts- The pictures, videos and images shown in this manual might have changed style or count due to the product being redesigned. So in rare cases the part may no longer be included or of a different style. However, if you think you are missing a part that is necessary to the assembly and use of your product, then first carefully double check all packaging for any parts you think are missing. Some parts might be hiding in the packaging or loose in an inner box.

Company Information and Support

Thank you for your Purchase

Thank you for purchasing the Fat Toad Folding DJ Laptop Stand. Your product comes with a 1-year factory warranty from purchase date. Please read all assembly instructions prior to assembling your new stand. Pictures that may aid in assembly can be found by going to www.Fattoadpro.com and typing LS400 into the search bar.

Folding DJ Laptop Stand
Assembly Instructions

Step 1 – Take the stand and push the locking pins. This will allow the upper and lower part of the stand to rotate 90°. Guide the upper and lower part to rotate as shown in Figure 1.

Figure 1

Step 2 – Take the middle shelf and place it in the middle of the stand. There will be 4 pairs of holes, place the middle shelf to your preference (See Figure 2). Once the middle stand is inserted, use the locking pin to secure the middle shelf. Insert the locking pin in the hole of the middle shelf at the back of the stand. This can be put either in front or back.

Figure 2

Step 3 – For safety reasons, please always make sure to test the stability and safety of the product before use. Double check all nuts and bolts, knobs and connectors, make sure that these are tight and securely fastened before use of your product. Test the product under light use or light loads the first time to confirm assembly and structure of the product is correct.

Figure 3

Please note that hardware bolts to assemble the stand maybe screwed into the parts themselves. So, for example, if you are missing a bolt that goes into the bottom base support tube, then look at the end of the bottom base support tube and you will see that hardware bolt is already screwed into the stand. All you need to do is unscrew that bolt and then screw it back in to assemble the two parts that connect on that end. If the stand is wobbly loosen up each bolt on the stand slightly. Then tighten up 1 bolt all the way as much as it will tighten. After that start on the next bolt that is completely opposite of the 1st bolt that you tightened. For example, if you first tightened up the bolt in the top right of the stand, then next start to tighten up the bolt on the bottom left. Keep going in order of the opposite bolt that you tightened up last. Once you are done, repeat the process of going through and tightening up the bolts one more time.
