TROUBLE SHOOTING

Performance Issue, Uneven or Unstable- Make sure all nuts and bolts are tight on the product. If they are, then loosen all nuts and bolts 1 full turn counter-clockwise, then go back and tighten each bolt only ½ turn tight. Then do a final tighten turn for another ½ turn tight. Next, Make sure there are not any missing nuts or bolts. Third, ensure all parts on the product are not broken or defective. Finally, Re-read the assembly instructions or watch the product demonstration video to ensure you have correctly assembled or are using the product properly with factory specifications.

Missing Parts- The pictures, videos and images shown in this manual might have changed style or count due to the product being redesigned. So in rare cases the part may no longer be included or of a different style. However, if you think you are missing a part that is necessary to the assembly and use of your product, then first carefully double check all packaging for any parts you think are missing. Some parts might be hiding in the packaging or loose in an inner box.

User Manual Model# RS657

Rack Mount Stand

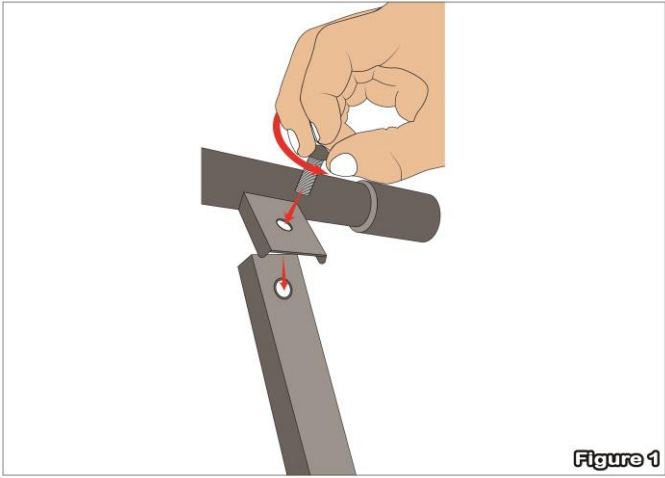

Griffin | 11408 Hwy 64 W, Tyler, TX 75704 |
info@griffin-stands.com | www.Griffin-Stands.com

ASSEMBLY INSTRUCTIONS

Step 1 – Take the back horizontal piece and use the bolt to screw to the inner bottom part of the rack mount stand. (See **Figure 1**) Hand tighten the nuts and bolts first then use an allen wrench to tighten the bolts all the way. Make sure to even the tightness on both bolts. Over tightening on one side may cause tension and may make the stand uneven.

Step 2 – Provided rack screws in the package is used to mount your equipment (See **Figure 2**). The screws will screw in the threaded holes on the rack rails. When your equipment is mounted together, there may or may not be spacing between each unit.

Step 3 – For safety reasons, please always make sure to test the stability and safety of the product before use. Double check all nuts and bolts, knobs and connectors, make sure that these are tight and securely fastened before use of your product. Test the product under light use or light loads the first time to confirm assembly and structure of the product is correct.

***Please note that heavier equipment is suggested to be mounted at the bottom part of the stand for a more stable and secure stand. Spaces between equipment is normal. And by design, the stand is tilted back at an angle for a more user friendly and easy access to the equipment.
